## EARTHQUAKE INTENSITY SCALE

Criteria of the Modified Mercalli Scale which were used to rate the intensities of the earthquakes registered were:

Intensity

- II Felt by a few people only. Duration or direction not appreciable.
  - III Duration or direction appreciable.
  - IV Rattling of doors and windows; swinging of suspended objects.
  - V Disturbance of movable objects; plaster cracked.
  - VI Overthrow of movable objects; cracking of chimneys and other brickwork.
  - VII Fall of some chimneys; some damage to buildings.
- 

Epicenters located in the following list are plotted on the accompanying map. A number and a letter are given beside each epicenter. The number is that assigned to the earthquake in the list. Only those earthquakes are given numbers for which epicenters were located. The letter represents the excellence with which the epicenter has been located, a indicating excellent, b good, c fair, d poor.

## EARTHQUAKES IN NORTHERN CALIFORNIA

(All intensities given on Modified Mercalli Scale)

## 1939 -- PACIFIC STANDARD TIME

- April 1, 9h 29m, p.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, Fresno; not reported felt; epicenter about 8 miles northwest of Gonzales. See map, epicenter 1d.
- April 4, 10h, 56m, p.m. Recorded at Berkeley and San Francisco; not reported felt; epicenter about 6 miles north of Danville. See map, epicenter 2d.
- April 5, 10h, 40m, a.m. Recorded at Palo Alto only; not reported felt; focus about 10 miles from Palo Alto station.
- April 6, 1h 43m, p.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, San Francisco. Intensities:
- IV East Oakland, San Leandro
- I-III Berkeley, Canyon, Oakland.
- Epicenter about 8 miles north of Hayward. See map, epicenter 3a.
- April 7, 5h 39m, a.m. Recorded at Mount Hamilton, Palo Alto, Fresno; not reported felt; epicenter about 4 miles southeast of Gonzales. See map, epicenter 4b.
- April 7, 2h 57 m, p.m. Recorded at Palo Alto only; not reported felt; focus about 11 miles from Palo Alto station (blast?).
- April 12, 8h 28m, a.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, San Francisco; not reported felt; epicenter about 9 miles east of Niles. See map, epicenter 5d.
- April 22, 4h 36m, p.m. Recorded at Ferndale only; not reported felt; epicenter about 20 miles from Ferndale.
- April 24, 11h 16m, p.m. Recorded at Berkeley, Mount Hamilton, Palo Alto; not reported felt; epicenter in Monterey Bay. See map, epicenter 6c.
- April 28, 10h 11m, a.m. Recorded at Berkeley only; not reported felt; focus about 9 miles from University campus.
- April 28, 12h 56m, p.m. Recorded at Palo Alto only; not reported felt; focus about 10 miles from Palo Alto station.

1939 -- P.S.T.

April 28, 2h 34m, p.m. Recorded at Ferndale and poorly at Berkeley, Mount Hamilton, Palo Alto, San Francisco. Intensities:

IV Scotia, Whitlow  
I-III Eureka, Ferndale, Upper Mattole.

Epicenter about 30 miles southerly from Ferndale.

May 1, 00h 48m, a.m. Recorded at Mount Hamilton and Palo Alto; not reported felt; epicenter about 8 miles east of Wrights. See map, epicenter 7b.

May 1, 1h 54m, p.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, San Francisco, Ferndale. Intensities:

V Capetown

IV Briceland, Cape Mendocino, Dyerville, Eureka, Ferndale, Honey Dew, Petrolia, Scotia, Upper Mattole, Westport

I-III Arcata, Blue Lake, Carlotta, Ethersburg, Garberville.

Epicenter at sea about 20 miles off Punta Gorda. See sub map.

May 2, 10h 48m, a.m. Recorded at Mount Hamilton, Palo Alto, Fresno; IV at Parkfield; epicenter about 6 miles north of Parkfield. See map, epicenter 8d.

May 2, 1h 21m, p.m. Recorded at Palo Alto only; not reported felt; focus about 12 miles from Palo Alto station.

May 9, 10h 17m, a.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, Fresno; not reported felt; epicenter about 7 miles southwest of Hollister. See map, epicenter 9b.

May 13, 7h 41m, a.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, San Francisco, Fresno; not reported felt; epicenter about 6 miles west of Priest Valley. See map, epicenter 10b.

May 16, 00h 24m, a.m. Recorded at Berkeley, San Francisco ( $\bar{S} - \bar{P} = 6$  sec. at Mineral); IV at Greenville; epicenter about 30 miles east of Mineral.

May 28, 2h 52m, p.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, San Francisco, Fresno; not reported felt; epicenter about 9 miles east of Castroville. See map, epicenter 11c.

May 30, 6h 05m, p.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, San Francisco, Fresno; IV at Aptos, Los Gatos, Santa Cruz, Soquel; epicenter about 6 miles south of Wrights. See map, epicenter 12c.

1939 -- P.S.T.

June 7, 7h 14m, a.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, San Francisco; felt at Healdsburg; epicenter about midway between Healdsburg and Jenner. See map, epicenter 13c.

June 12, 6h 42m, p.m. Recorded at Mount Hamilton, Palo Alto, Fresno; not reported felt; epicenter about 6 miles northeast of Panoche. See map, epicenter 14d.

June 12, 10h 58m, p.m. Recorded at Mount Hamilton, Palo Alto, Fresno; not reported felt; epicenter about 3 miles north of Idria. See map, epicenter 15c.

June 17, 5h 55m, a.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, San Francisco; not reported felt; epicenter about 17 miles northeast of Mount Hamilton. See map, epicenter 16b.

June 21, 8h 34m, a.m. Recorded at Ferndale only; "felt by a very few near Ferndale;" epicenter about 20 miles from Ferndale. Probably a foreshock of next earthquake.

June 22, 10h 42m, a.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, Ferndale. Intensities:

V Upper Mattole

IV Capetown, Ettersburg, Ferndale, Fields Landing, Loleta, Petrolia, Scotia

I-III Cape Mendocino, Eureka, Punta Gorda Light Station.

Epicenter at sea about 6 miles northwest of Punta Gorda. See sub map.

June 23, 9h 28m, a.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, Fresno ( $\bar{S} - \bar{P} = 2.5$  sec. at Mineral); V at Broke Off Mountain Lookout Station near southeast corner of Lassen National Park, strong in Warner Valley, felt at Manzanita Lake and Mineral; epicenter about 12 miles from Mineral.

June 24, 5h 02m, a.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, San Francisco, Fresno. Intensities:

VII Cienega (13 miles south of Hollister), Hollister, Paicines

VI Bitterwater, Spreckels, Tres Pinos

V King City

IV Almaden, Aptos, Aromas, Ben Lomond, Big Basin, Big Sur, Blanco, Boulder Creek, Bradley, Cambria, Carmel, Castroville, Cayucos, Chualar, Coalinga, Creston, Davenport, Gilroy,

1939 -- P.S.T.

Gonzales, Lockwood, Lonoak, Los Banos, Marina, Milpitas, Monterey, Morgan Hill, Moss Landing, Nipomo, Pacific Grove, Pinnacles, Salinas, San Ardo, San Juan, San Lucas, San Miguel, San Simeon, Santa Margarita, Seaside, Soquel, South Dos Palos, Templeton, Tranquillity, Watsonville.

I-III Capitola, Half Moon Bay, Los Gatos, Mendota, Parkfield, San Martin, Santa Cruz, San Francisco, Volta; felt in Paso Robles and Soledad.

Epicenter about 4 miles west of Tres Pinos. See map, epicenter 17b. This epicenter was based primarily on field data collected by D. S. Carder of the U. S. Coast and Geodetic Survey. He found a small area on the San Andreas Fault where damage was a maximum. This epicenter fits the instrumental data if the depth of focus is taken at 30 km. and the first arrivals at Mount Hamilton and Fresno are taken as P\* while those at the other stations are taken as P<sub>1</sub>.

June 25, 7h 15m, a.m. Recorded at Palo Alto only; not reported felt; focus about 13 miles from Palo Alto station.

June 25, 12h 53m, p.m. Recorded at Berkeley, Mount Hamilton, Palo Alto, Fresno; I-III at Hollister; an aftershock of earthquake of June 24, 5h 02m, a.m.

June 26, 5h 36m, a.m. Recorded at Mount Hamilton and Palo Alto; IV at San Benito Winery (very near epicenter 17), I-III 9 miles east of Chualar; an aftershock of earthquake of June 24, 5h 02m, a.m.

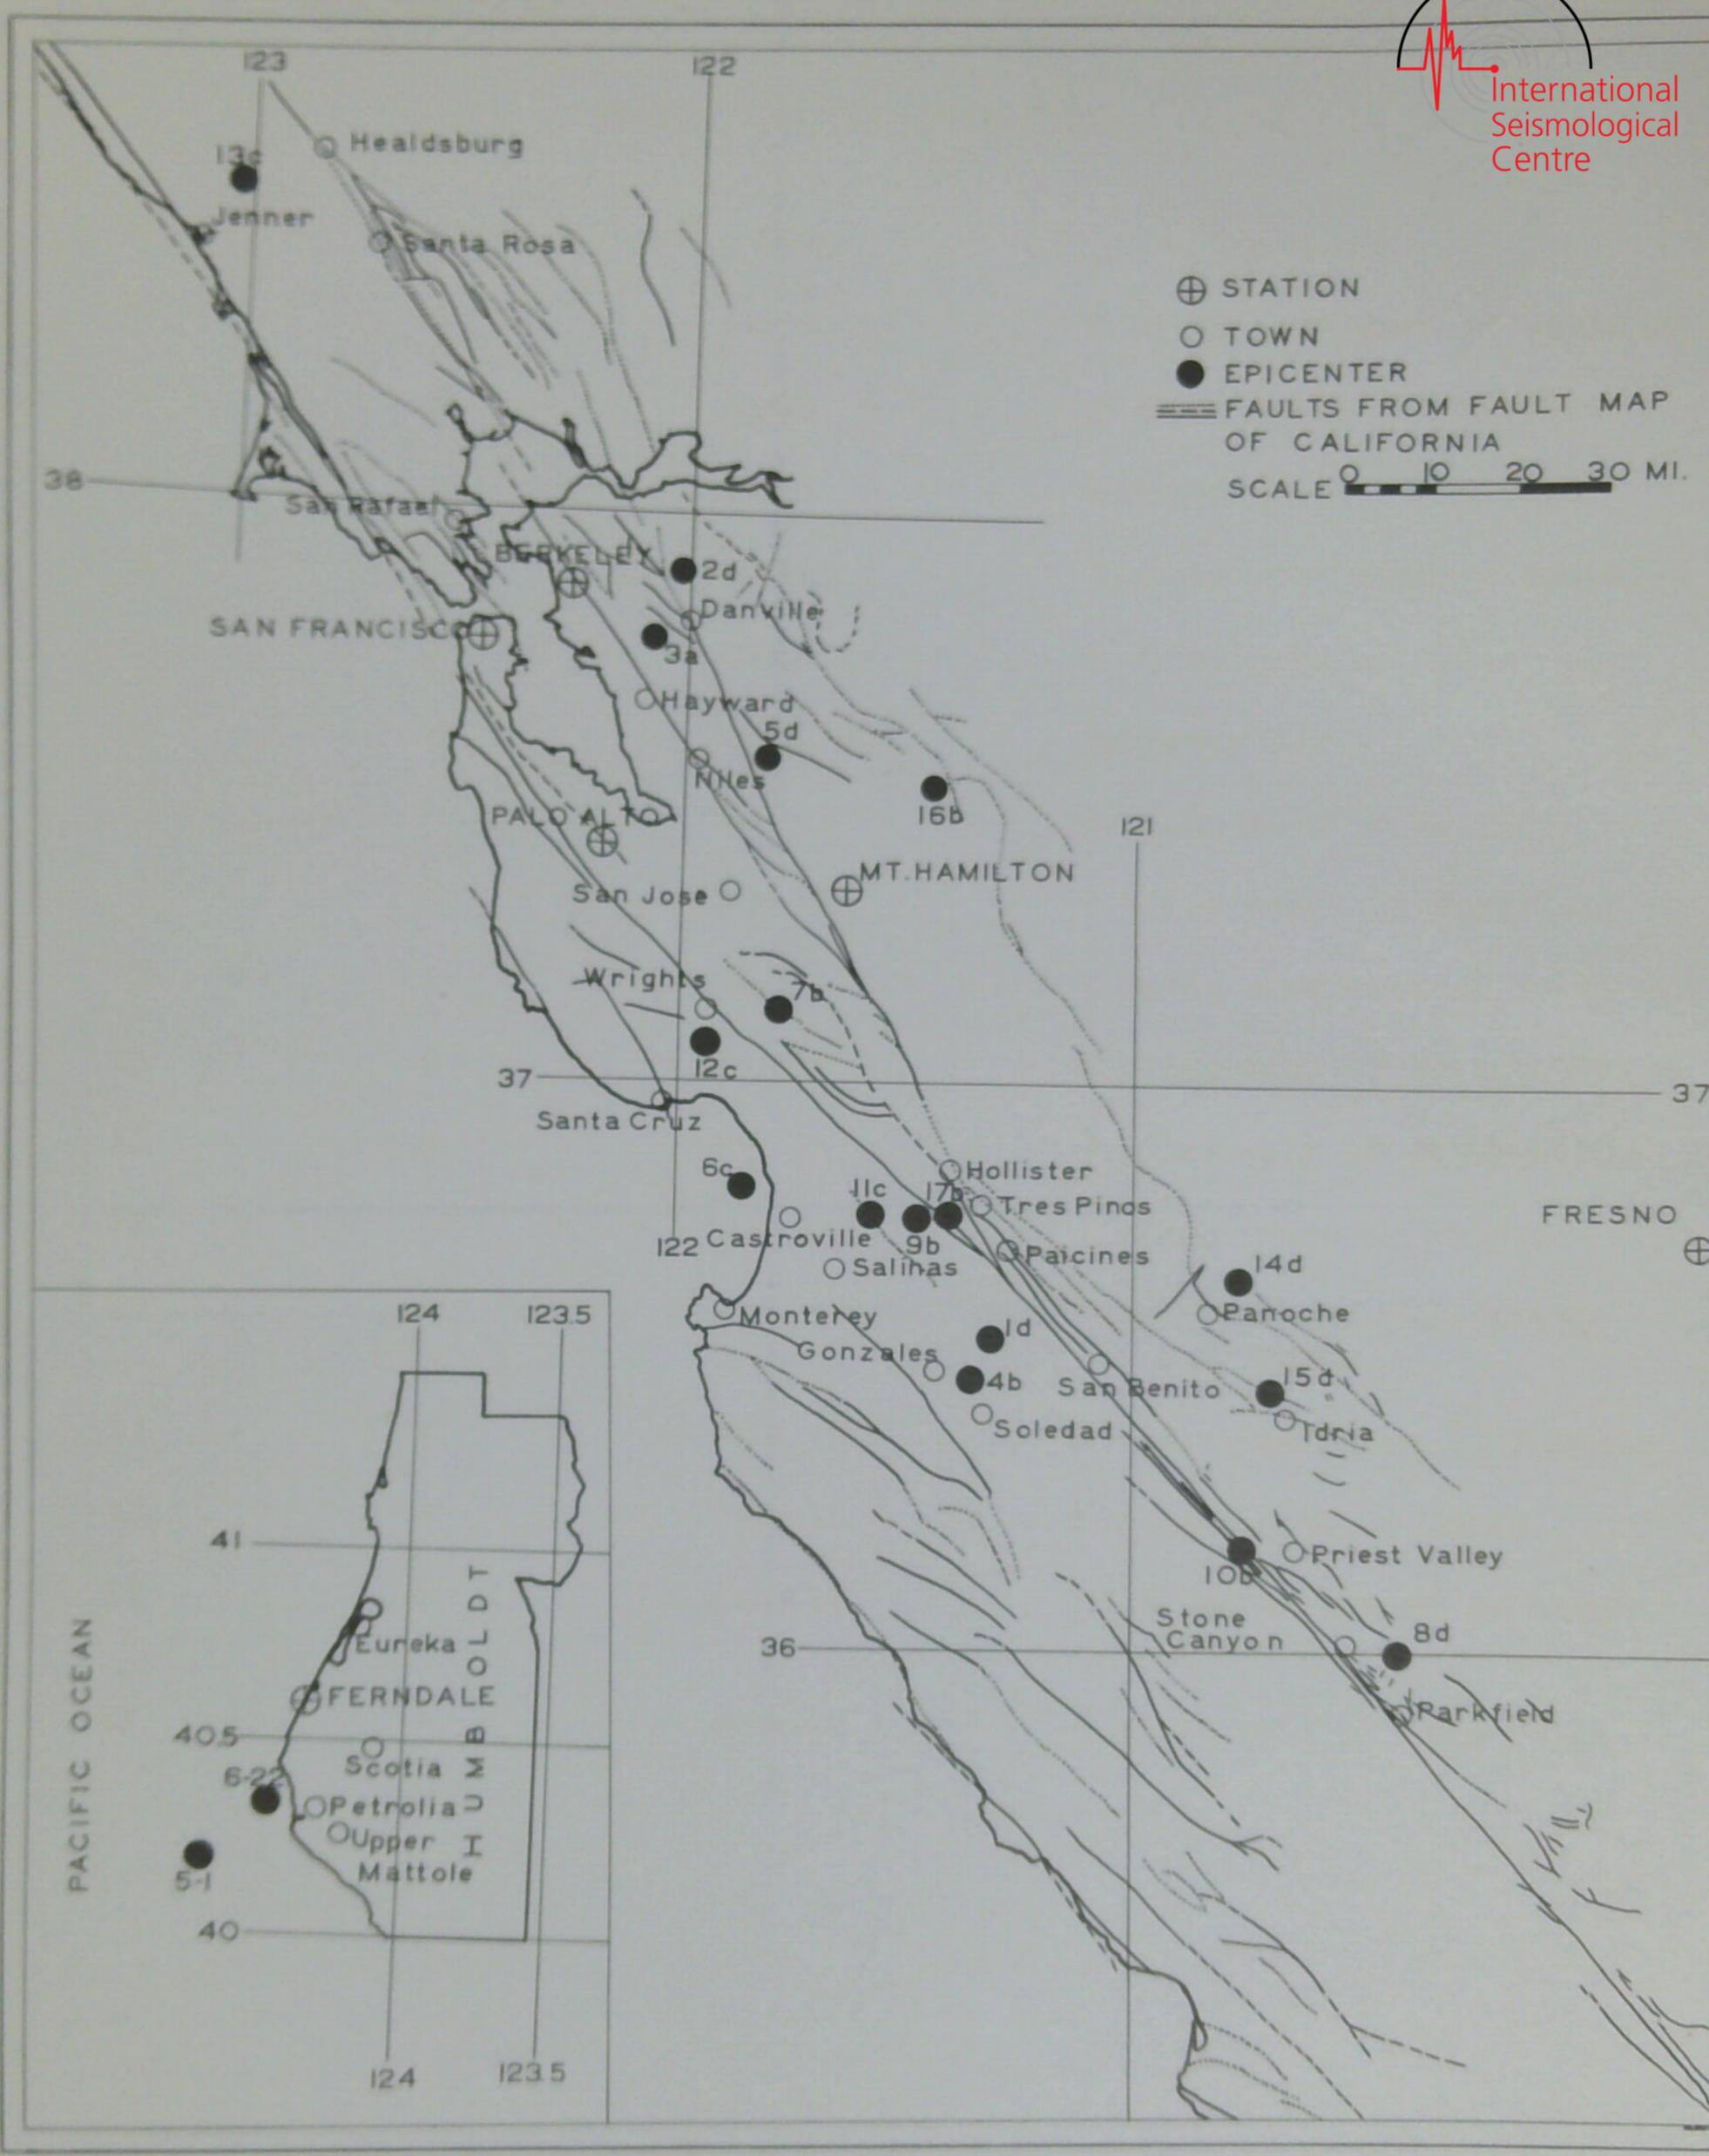

June 26, 10h 12m, p.m. Recorded at Mount Hamilton and Palo Alto; not reported felt; an aftershock of earthquake of June 24, 5h 02m, a.m.

June 28, 8h 52m, a.m. Recorded at Mount Hamilton and Palo Alto; IV at San Benito Winery (very near epicenter 17); an aftershock of earthquake of June 24, 5h 02m, a.m.

## SUMMARY OF THE EPICENTERS

No.	Rating	Date	Location
1	d	April 1	8 miles northwest of Gonzales
2	d	April 4	6 miles north of Danville
3	a	April 6	8 miles north of Hayward
4	b	April 7	4 miles southeast of Gonzales
5	d	April 12	9 miles east of Niles
6	c	April 24	Monterey Bay
7	b	May 1	8 miles east of Wrights
8	d	May 2	6 miles north of Parkfield
9	b	May 9	7 miles southwest of Hollister
10	b	May 13	6 miles west of Priest Valley
11	c	May 28	9 miles east of Castroville
12	c	May 30	6 miles south of Wrights
13	c	June 7	Midway between Healdsburg and Jenner
14	d	June 12	6 miles northeast of Panoche
15	c	June 12	3 miles north of Idria
16	b	June 17	17 miles northeast of Mount Hamilton
17	b	June 24	4 miles west of Tres Pinos

MAP SHOWING EPICENTERS, APRIL 1, 1939 TO JUNE 30, 1939

THE REGISTRATION OF EARTHQUAKES

## SYMBOLS AND NOTATIONS EMPLOYED

1. Character of the Earthquake--

	I. Perceptible.	II. Moderately Strong.	III. Strong
d (terrae motus domesticus)	Local shock (origin less than 100 kilometers distant).		
v (terrae motus vicinus)	Near shock (origin from 100 to 1,000 kilometers distant).		
r (terrae motus remotus)	Distant shock (origin from 1,000 to 5,000 kilometers distant).		
u (terrae motus ultimus)	Very distant shock or teleseism (origin more than 5,000 kilometers distant).		

2. Phases of the Seismogram--

P (undae primae)	Normal first phase, or first preliminary tremors (longitudinal).
P'	First preliminary tremors which have penetrated the core of the earth.
PR <sub>n</sub>	Waves n times reflected at the earth's surface.
S (undae secundae)	Second phase, or second preliminary tremors (transverse).
SR <sub>n</sub>	Waves n times reflected at the earth's surface.
PS	Waves changed from longitudinal to transverse oscillation or vice versa through reflection at the earth's surface.
PPS	Waves twice reflected at the earth's surface, having been longitudinal on two branches of the path and transverse on one branch.

In general a bar over two letters denoting types of waves indicates refraction. The subscript <sub>c</sub> denotes the boundary at about 2900 km. depth between the core and the middle shell which surrounds it. Thus:

$\overline{S_c P_c S}$	Waves which have penetrated the core, having been transverse before entering and after leaving the core, and longitudinal within the core.
$\overline{P_c P_c} \overline{P_c P}$	Waves refracted at the core boundary into the core, reflected once at this boundary while within the core and again refracted out of the core, having remained longitudinal on all branches of the path.
L (undae longae)	Long waves of surface phase preceding M.
M (undae maximae)	Shorter and more regular waves of large amplitude in the surface phase.
M <sub>n</sub>	Greatest motion in the surface phase.
C (coda)	Tail or end portion.
F (finis)	End of discernible movement.

For local earthquakes a special notation is used:

$\overline{P}$	The longitudinal wave which has traveled its whole path in the surface layer or crust of the earth.
$\overline{S}$	The transverse wave which has traveled its whole path in the surface layer of the earth.
P*	The longitudinal wave which has traveled the horizontal portion of its path in the intermediate layer.
S*	The corresponding transverse wave.

### 3. Nature of the Motion--

i (impetus)	Sudden beginning of the motion.
e (emersio)	Gradual beginning of the motion.
T (period)	Time of one complete oscillation.
A	Trace amplitude measured from the media line, + earth motion toward east, north, or zenith, - toward west, south, or nadir.
A <sub>E</sub>	E-W component of A.
A <sub>N</sub>	N-S component of A.
A <sub>Z</sub>	Vertical component of A.

### 4. Time--

O (origin)	Time of shock at point of origin.
------------	-----------------------------------

## BERKELEY

THE BERKELEY STATION, UNIVERSITY OF CALIFORNIA  
BERKELEY, CALIFORNIA

---

 CONSTANTS

## CONSTANTS OF THE STATION

Latitude and longitude:

$$\begin{aligned}\varphi &= 37^{\circ} 52!3 \text{ N.} \\ \lambda &= 122^{\circ} 15!6 \text{ W.}\end{aligned}$$

Time.--All determinations are reduced to Universal Time.

Altitude.--81 meters (266 feet) above mean sea level.

## CONSTANTS OF THE SEISMOGRAPHS

Apparatus	Component	V		$T_0$	$\epsilon$	$\frac{r}{T_0^2}$	
Bosch-Omori 100 kg. ...	E	45		12	10	0.001	
	N	45		12	10	0.001	
Wiechert 80 kg. ....	Z	44		4	5	0.005	
Wood-Anderson .....	E	3,000		0.9	15		
	N	3,000		0.9	15		
Galitzin .....		K	T	$T_1$	$\mu^2$	$A_1$ (cm)	l (cm)
	E	112	12	11.8	0.00	100	11.3
	N	122	12	12.4	0.03	100	11.2
	Z	109	12	11.9	0.01	130	14.9
Benioff .....	Z	V		Coupled Period		$\epsilon$	
				0.7		5	

The letter G before a reading designates that the seismogram was from the Galitzin instrument; W, Wiechert; B, Bosch-Omori; A, Wood-Anderson; H, Benioff.

## FERNDALE

 THE FERNDALE STATION  
 FERNDALE, CALIFORNIA

## CONSTANTS

## CONSTANTS OF THE STATION

Latitude and longitude:

$$\phi = 40^{\circ} 34' \text{ N.}$$

$$\lambda = 124^{\circ} 16' \text{ W.}$$

Time.--All determinations are reduced to Universal Time.

Altitude.-- 17 meters (55 feet) above mean sea level.

## CONSTANTS OF THE SEISMOGRAPHS

Apparatus	Component	V	T <sub>0</sub>	$\epsilon$
Bosch-Omori 25 kg. ....	E	12	11	5
	N	12	8	5

The station is operated by Mr. Joseph Bognuda, of Ferndale, in cooperation with the University of California.
